COMP 590 - Android Development P4 Implementation Problem 1

Our project is hosted on github repository. The link to the repository is https://github.com/NiranjanPawarGit /Sotware-Engineering-Daily .The branch name is **feature/comp590android-dev**

The steps to get it running is to clone the project and in android-studio compile and run it. It uses **targetSdkVersion 27** and **minSdkVersion 21**.
